- Special Incentives for Fatherless and Economically Weaker Students.
- Same syllabi, same duration and same mode of examinations like the PU regular students.

Our Goal

We specialize you in the field of Statistics which is specifically designed to foster your critical thinking, drawing, and interpretation skills. Our course will teach you how to discern patterns, establish connections, and organize & analyze data, all while refining your analytical and reasoning abilities. The educational objective of teaching Statistics is to develop problem-solving skills, enhance reasoning power and visualization capabilities, as well as fortifying your algebraic skills and critical thinking in Statistics. Statistical education helps individuals to emerge as skilled persons and to grow independent to earn their livelihood.

Teaching-Learning Process

The course is delivered to the students through the printed study material dispatched to them and through the lectures (hybrid mode) during the Personal Contact Programme (PCP). The PCP is for one week for all the semesters. During the PCP, the teachers interact with the students and try to give an overview of the whole syllabi of the semester. Innovative techniques and learner-centric pedagogies are used to engage the students.
